

2022 TSANZ Masterclass in Transplantation

Preliminary Program

Adelaide Convention Centre

Sunday June 19, 2022

Session 1: Clinical Management of Transplant Recipients - modern challenges and difficult conversations		
0800 – 0805	Welcome	Chanel Prestidge and Chris Drogemuller
0805 – 0835	Post-transplant diabetes risks and recommended management	Rinki Murphy
0835 – 0905	Palliative care in transplantation – when to introduce palliative care and advance care planning (context of cancer or failing allografts)	Frank Brennan
0905 – 0935	Impact of obesity in transplant recipients and donors – a surgical perspective and post-transplant complications/management	Ian Michell
0935 – 1005	Covid 19 and management of the transplant recipient	Kieran Halloran
1005 – 1025	Morning Tea	
Concurrent Session 2A: Optimisation and options for recipient – donor pairing		
1025 – 1030	Intro	Fiona Mackie and Paul Manley
1030 – 1100	The utility and application of genetic testing pre- SOT	Amali Mallawaarchchi
1100 – 1130	Cell free DNA – acute rejection marker	John Whitlam
1130 – 1200	Update on current deceased donor allocation algorithms	Rhonda Holdsworth /Josh Kausman
1200 – 1230	Current options for the cross match incompatible pair and highly sensitized recipient on wait list – case-based discussions	Kate Wyburn
1230 – 1235	Final remarks	
Concurrent Session 2B: The role of peptides, IRI and cell therapies in transplantation		
1025 – 1030	Intro	Darling-Rojas Canales and Claire Jessup
1030 – 1100	The Role of peptides in allorecognition	Alexandra Sharland
1100 – 1130	Stem cell-derived islets – a potential beta cell replacement solution for all	Jon Odorico
1130 – 1200	Ischaemia Reperfusion Injury in Transplantation	Natasha Rogers
1200 – 1230	Mesenchymal stem cells in transplantation	Yves Beguin
1230 – 1235	Final remarks
